Has your workplace received sufficient local exhaust ventilation (LEV) training?

Every year, thousands of employees fall ill to contaminants they inhale at work, despite using extraction and masks. Do you know where you stand legally when it comes to the design and use of your local exhaust ventilation (LEV) system? Do you know whether you are using your LEV system correctly? Do you know what to do if your LEV system breaks? HSE - Health Safety Executive

Who is LEV training for?

If you answered 'no' to any of the above questions, this local exhaust ventilation course is for you. This course is a user's guide, ideal for the health and safety manager and maintenance or safety representative. You and your workforce will learn all the necessary steps to keep LEV systems in working order and promote safety.

What does the LEV course cover?

The LEV course covers:

- The legislation associated with LEV systems.
- How LEV fits into the hierarchy of control of hazardous substances.
- How to prevent damage to LEV systems.

What is the benefit of LEV training for your business?

This online course provides quick but effective training on using LEV systems to minimise downtime in your workplace. Staff can complete their training at any time to suit your needs.
